## 1. OVERVIEW AND BACKGROUND

The North Carolina Division of Public Health (DPH) received funding from the Centers for Disease Control and Prevention (CDC), the COVID-19 PH Workforce Grant, to establish, expand, train, and sustain the state, tribal, local, or territorial (STLT) public health workforce to support jurisdictional COVID-19 prevention, preparedness, response, and recovery initiatives.

As part of this initiative, DPH made available funds for the ten regions identified by the North Carolina Association of Local Health Directors (NCALHD) to recruit, hire, and train personnel to fill critical gaps in its Public Health Infrastructure Foundational Capabilities (FCs)—the suite of skills, programs, and activities that must be available in state and local health departments everywhere for the health system to work anywhere—defined as: 1) Assessment & Surveillance, 2) Community Partnership Development, 3) Equity, 4) Organizational Competencies, 5) Policy Development & Support, 6) Accountability and Performance Management, 7) Emergency Preparedness & Response, and 8) Communications.

NCALHD Region 7 is comprised of seven Local Health Departments (LHDs) in north-central North Carolina. Participating counties include Franklin, Granville, Johnston, Nash, Vance, Wake, Warren and Wilson. The Lead LHD for Region 7 is the Granville-Vance District Health Department (“GVDHD”), a district LHD which serves both Vance and Granville counties.

Region 7 will procure by competitive proposal a qualified firm (the “firm”) to conduct Leadership, Management and Supervision training with an overarching goal of increasing LHD management capacity to fill critical gaps in its FCs.

## 2. PROJECT OVERVIEW

In December 2021, DPH conducted a Regional Foundational Capabilities Rapid Assessment to understand regional needs related to FCs. The needs assessment was intended to initiate collaborative decision making within each region to identify and prioritize opportunities to build a stronger public health workforce through staffing and training.

The needs assessment is a component of the ARPA Public Health Workforce Initiative, which supports regional efforts to recruit, hire, and train personnel to address projected COVID-19 response needs in the 10 North Carolina Association of Local Health Director regions and to focus on strengthening the public health FCs to address the full scope of local public health.

The needs assessment captured real-time feedback regarding each Region 7 LHD's status, challenges and needs as they relate to the eight FCs. Region 7 identified organizational performance and support needs around three FCs as priority areas:

1. Assessment and Surveillance - includes efforts and activities around data access, reporting, and analysis; community health assessments; and rapid detection.
2. Accountability and Performance Management - includes activities around monitoring objectives, using evidence-based practices, maintaining standards, and promoting a culture of quality improvement.
3. Policy Development and Support - emphasizes the importance of establishing and maintaining public health policy recommendations and informing and influencing outside policies.

To enhance staff capacity across these three FCs, Region 7 is issuing this RFP to procure a qualified firm to increase FC leadership abilities across Regional communities of practice.

### 3. SCOPE OF WORK

Region 7 has established the following objectives for this project. Any changes to the specifications or Scope of Work will be made in the form of an Addendum to this Request for Proposal and will be supplied to all prospective contractors and posted on the GVDHD website. Region 7 may negotiate and refine the final Scope of Work with the selected contractor. Region 7 reserves the right to negotiate additional services with the selected contractor at any time after the initial contract award. **GVDHD reserves the right to extend the period of performance after the initial contract award, contingent upon an approved no-cost extension by the grant funding source.**

Region 7 envisions creating a training curriculum focused on the FCs and tailored to six communities of practice to provide LHD leaders with the skillset needed to execute program strategies and create organizational direction, alignment, and commitment. Suggested topics for leadership training include, but are not limited to:

- Diversity, Equity and Inclusion
- Supervision and management – crucial accountability / supportive accountability
- Resilience Development
- Assessments and Counseling in self-discovery and leadership

Because this capacity building training is expected to increase cooperation and problem-solving across the seven LHDs of Region 7, we anticipate training programs to be provided across six communities of practice. A community of practice is a group of people who share a common concern, a set of problems, or an interest in a topic and who focus on sharing best practices and creating new knowledge to advance a domain of professional practice. Region 7 has identified the following six communities of practice across its LHDs:

- Senior Leadership Staff
- Environmental Health
- Nursing/Clinic leadership
- Health Education and Promotion
- Billing and Customer service
- Dental staff (as applicable; currently three LHDs provide dental services)

Proposals should include detailed descriptions of the process the firm would undertake to determine specific leadership training components; how training components would be adapted for presentation across the six communities of practice; options for remote and LHD-hosted events; and performance measures to ascertain the efficacy of program participation across the six communities of practice.
